Biography

Linda Schneider is a professional calligrapher and artist that has taught at several international conventions, conferences and national workshops. She is an author, speaker, and has won awards at international art shows, but her first love is teaching. She has been designing for the Papyrus Card Company for over almost two decades where she creates art work and text through calligraphy. For the past 40 years, she has used calligraphy in paintings, Hollywood props, chalkboards, billboards, sculpture, wedding invitations, and private parties. Calligraphic Design and Script using Markers and the Liquid Chrome Pen

Calligraphy that Creates Smiles

I will be demonstrating how to design with flourishes and script while writing on glass, and writing notes of encouragement with the brush markers on the go.

Make your gifts special by personalizing them with calligraphy. Give wine with a special inscription on the bottle, a personalized box of candies, or write on a vase with a bouquet of flowers. You can even write on the green leaves. Using one special pen, the Liquid Chrome, to lay down beautiful letters or words in liquid silver that shines with a mirror finish. You will need blank index cards 3"x5" **or** blank paper handy to work on during the program. Also, please have your favorite markers, brush or chisel. One of my favorite things to do is writing peoples names out. It can touch their heart like nothing else can, especially when they see it done in person in front of them. ***It also lets you practice, so you don't have to be perfect to start.*** We will practice with different formats and flourishes when writing names out and words of encouragement. What ever is your favorite script or hand, that may be what you will want to start with. It can be done with a pencil, ballpoint pen, pointed brush marker, or broad edge marker, *something easy to carry in your purse or pocket.* You can do calligraphy on the go. Leave your dipped pen and ink at home and do calligraphy outside your studio. Even though you are spending one minute doing something nice for someone else, it comes back as pure joy to you. Pro tip, if you write a business owners name out on the back of your business card, they are likely to keep YOUR card forever.

I will be challenging you to do calligraphy on the go and at home. Create smiles, pass on a little kindness and help keep hand calligraphy alive.
